STATFUL

THE ART AND SCIENCE OF DATA VISUALISATION

Statful is the next generation of data aggregation and visualisation platform. An intersection of art and science. That brings together raw data streams to show the full spectrum of your business. **Always on. Always working.** Allowing you to scale without risk.

What we're all about:

Statful's partnership with AWS cloud hosting gives you unrialled availability, safety and scalability.

Feel the power of when art meets science. Explore data streams across multi-dimensions, and analyse your spectrum in beautiful full colour.

Bring your world together with a sharing feature that empowers your operations and business units. With the tools they need to thrive.

Statful can integrate data from any source and seamlessly scale to the volumes at hand. So we're with you every step of the way.
Statful. Stay one step ahead.

Business is all about growth. So you need to be able to scale with systems that are ready to move with you. Statful is designed to adapt. Frictionless. With the power to handle what comes next.

Want to learn more about how Statful can help you spot patterns and see the full spectrum of your business? Organise your free Statful demo at **statful.com** or please contact **sales@statful.com** with any further questions.

CUSTOMISABLE METRICS. REAL-TIME DATA.

STATFUL

IN THE MOMENT

Statful is always on. A real-time aggregator for all your data streams. Detect trends. No hunches. No refresh. No downtime. So you can stay in the moment and see everything as it happens.

What we're all about:

Stay one step ahead of critical issues with real-time multi-channel notifications.

Powered by InfluxDB. Giving you high performance and 24/7 response. Ingest huge amounts of data and retrieve it in real-time. All in one place.

Statful lives in the cloud. Meaning our platform is available anywhere and anytime. However you need it.

See data your way with responsive graphs and customisable data views.

Statful. Stay one step ahead.

Business has never moved faster. Customers expect 24/7 service and information. That's why Statful deals in real-time streams. Not batches of already old information. So you can keep an eye on the detail and a finger on the pulse. As it happens.

Want to learn more about how Statful can help you spot patterns and see the full spectrum of your business? Organise your free Statful demo at **statful.com** or please contact **sales@statful.com** with any further questions.

STATFUL

SEE THE WORLD YOUR WAY

Tailor Statful to your business. However you need it. Configure data streams, compute them, choose what to analyse and how to visualise it. Join the dots. **Spot the patterns.** See the world your way.

What we're all about:

Statful is built with flexibility and integration in mind. Letting you get on with telling your own data story.

_____

Slice through data with custom tags or baselines. Share and visualise your streams on-the-go. In a perspective everyone can see.

_____

Seamlessly send custom metrics. Use industry-standard open source collectors. Whatever your style. It's centralised across the operations stack and good to go.
Statful. Stay one step ahead.

Every company is unique. No two sources or systems are the same. Or their data. That's why you need a platform that can be configured to you. That provides a common way to view your business. Smoothly. Intuitively. However you need it.

Want to learn more about how Statful can help you spot patterns and see the full spectrum of your business? Organise your free Statful demo at **statful.com** or please contact **sales@statful.com** with any further questions.

VALUE YOU CAN MEASURE

Seeing real-time trends and configuring our system to your business leaves everyone better prepared. **To save time, money and manpower.** Freeing up resources to let you get on with business. However you do it. With the power to see the world your way.

What we're all about:

Statful is here from day one. To configure the system as you need it. We can be up-and-running in no time. And there for you every moment after.

Your systems evolve and so do we. Our wide range of support options means we'll keep up with your business needs. However they change.

Our telemetry system uses scalable, cloud-based infrastructure. Meaning we take care of all the maintenance. You don't even need to install it on-site.

Statful. Stay one step ahead.

We know that if you can't measure something, you can't value it. That's why our platform is designed to give results from day one. You work hard for your money. Let Statful work hard for you.

Want to learn more about how Statful can help you spot patterns and see the full spectrum of your business? Organise your free Statful demo at **statful.com** or please contact **sales@statful.com** with any further questions.

Statful is a Telemetry System that's hosted in the Cloud. It's designed with simplicity and flexibility in mind. It removes the burden of managing a real-time system on your premises.

Statful for Tech & Engineering

Statful is your go-to tool for analysis and your preparation for any big event. Our platform allows you to generate concise, clear and comprehensive reports on your performance tests, and create dashboards that act as real-time warning systems for Ops and IT teams.

Statful for Business

Our vision is to improve customer satisfaction and retention by helping rapidly identify possible issues with your data. Long before customers are affected. With Statful anybody can become a data specialist. No rocket science required.

Statful is a source-agnostic monitoring platform. Leaving you to instrument the world your way. Get insights to your stack, under the hood of your application or even on a WebSummit event through Twitter's API, in real-time. However you need it, we can handle it.

Characteristics:

Simplicity

Send metrics to Statful using a straightforward line protocol. Statful's ability to split data into streams allows you to separate the data from the noise.

Scalability

Statful handles high volumes of metrics without breaking a sweat. We've already run up to 150k metrics per second for one client, and we've got a lot left in the tank.

Empowerment

Statful empowers your perspective by allowing complete customisation of your dashboards. Selecting exactly which metrics you need and how to use them.

Open Source

We support an increasing set of client-side languages and frameworks! Choose a Kubernetes or AWS collector, a Vert.x client or beyond, and quickly gather your metrics with minimum effort.

Features:

Data Exploration

Statful's extensive instrumentation allows you to obtain requests per second, response times, CPU, memory usage, database call execution times and much more. All in real-time and neatly separated by environment and endpoint.

Data Visualisation

Statful ingests your data and syncs it to customisable, interactive graphs. Use it to detect when traffic on your infrastructure is creeping to critical levels. Use baselines to pinpoint where the fail would occur. Even anticipate which endpoints might cause an incident. So no more downtime.

Alerts

Tell Statful exactly when you need to be alerted. Then sit back. Safe in the knowledge that your data will be measured in real-time. With information sent directly to Slack, Pagerduty, e-mail or whichever channel best suits you, using our Webhooks integration.

For more information or to view a demo of the Statful platform please visit our resources page – where you'll find case studies and documentation – or contact **sales@statful.com** to discuss your data needs.
